WARNING – GENERAL INSTRUCTIONS – SAFETY PRECAUTIONS

Only qualified personnel may carry out electrical installations. The manufacturer assumes no responsibility for injuries or damages caused by unauthorized use of the lamp. Lamps may only be used for their intended purpose. Indoor lamps must not be used outdoors. Before use, ensure that all components are complete. Do not cover the lamp with other objects. Do not connect the lamp to power or operate it while it is still in its packaging. Lamps and transformers develop high temperatures during operation; improper use may pose a fire hazard. Allow them to cool before performing any action. Any modifications or repairs must be carried out exclusively by the manufacturer, an authorized service representative, or other authorized personnel.

Do not use the lamp with wet hands.

Before use, ensure that the cables are not damaged during unpacking or during operation.

Before cleaning, the lamp must be switched off and unplugged from the power source. Allow the lamp to cool for at least 10 minutes before cleaning. Cleaning is limited only to the external surfaces. Clean the lamp only with a soft or dry cloth.

Do not disassemble the product yourself to avoid electric shock. Do not excessively adjust or force the joints to avoid damaging the lamp. Do not use the lamp in environments with high temperature or high humidity. Do not look directly into the LED light source to avoid eye injury.

If any of the following conditions occur, unplug the lamp immediately and stop using it (call for assistance if necessary):

The power cable or plug is cut/torn/damaged

The lamp housing is wet

The lamp head or joints are broken

The lamp emits smoke or sparks

The LED light flickers or has broken

At the end of its service life, this lamp should not be treated as ordinary waste but must be disposed of at a collection point for recycling electrical/electronic devices. Relevant indications are found on the product, the instructions, or the packaging. The materials are recycled according to their markings. By recycling materials or other forms of recovery from electrical equipment waste, you contribute significantly to environmental protection. Find the nearest recycling collection point.

INSTRUCTIONS FOR USE

The lamp operates using electricity. Connect one end of the cable to the lamp and the other end to the adapter. Warning: Use only the adapter intended for this lamp DC5V-1-2A; otherwise, damage to the lamp may occur. Place the lamp indoors on a stable, level surface. Do not expose it to sunlight, rain, or humid environments. The lamp has touch controls on its base. Press the buttons with clean hands. Refer to the picture below for the function of each button. When adjusting the lamp head, hold the base. Sudden or excessive adjustment may damage the lamp. Do not disassemble the product. If you need assistance, contact a qualified technician. The SMD LEDs are not replaceable.

LED Touch Desk Lamp
52 LED
SMD2835 / Power: 10W /
Brightness: 450 Lumens /
Voltage: 220-240V
Adjustable light intensity and
CCT color change options:
3000K-4000K-6000K
With USB charging port 5V/1A

located on the back of the
lamp base
With timer function: The light
turns off automatically after
30 or 60 minutes
Material: Plastic and alu-
minum
Includes adapter and 120 cm
USB cable
